

DENVER CAMPUS

Located in Broomfield, only 30 minutes north of downtown Denver, our 52,000 sq ft site sits adjacent to Rocky Mountain Metropolitan Airport. This campus trains students in two technology-based disciplines. Equipment on campus includes over 80 powerplants including two Rolls Royce RB 211-22B turbine engines, three Cessna 172s, Beech C-35 Bonanza, Lear Jet Model 24D, and a Falcon 20.

**YOUR FUTURE
IS ON THE
HORIZON**

 **SPARTAN**
COLLEGE
OF AERONAUTICS AND TECHNOLOGY

OUR STORY

In 2018, we celebrate our 90th year of service to the aviation industry. From the manufacturing of early aircraft, to the training of WWII cadets, Spartan has successfully trained over 140,000 technicians and pilots. Recognized as a trusted leader, throughout the aviation world, Spartan students come from across the United States and more than 62 countries.

OUR PROGRAMS

Aviation Maintenance Technology (AMT)

AMT technicians keep aircraft in safe flying condition by servicing, repairing and overhauling aircraft components while following detailed federal regulations set by the FAA. Students in our A&P program study a variety of subjects, such as: Hydraulics and Pneumatics, Ignition and Electrical Systems, Fuel Systems, Pressurization, Aircraft Welding, Turbine-prop and Jet Engines. At Spartan, you could graduate in just **20 months with an Associate of Applied Science degree.**

Aviation Electronics Technology (AET)

Aviation Electronics Technology is also commonly referred to as Avionics or Aircraft Electronics. Avionics technicians can work in maintenance, repair, manufacturing and installing new systems. Graduates of Aviation Electronics Technology are not only trained in basic electronics, but in advanced aircraft communication and navigation equipment and their specialized test equipment. With the advances of technology this also includes the field of unmanned aerial systems or working with unmanned aerial vehicles commonly referred to as drones. These skills align to the Aerospace, Transportation, Manufacturing, and Medical Device industries. You could complete an **Associate of Applied Science degree in as few as 15 months.**

AFFORDING YOUR EDUCATION

The decision to attend college is one of the most important choices you'll make in your life. We understand this, and will work with you to develop a financial plan that best meets your individual needs.

Grants, Loans and Other Forms of Aid

The Spartan student finance team guides you step-by-step to identify financial aid options for which you may qualify. This includes helping you complete your Free Application for Federal Student Aid (FAFSA).

Scholarships

Spartan awards scholarships to qualified students.

Student Job Assistance

Most Spartan students hold a job while attending college. Our career services team actively seeks out local job opportunities that fit your experience and often enhance your studies.

Industry Outlook

There's a major shortage of highly-trained mechanics and technicians in the field of aviation. And we're not just saying that.

The Boeing Outlook forecasts that more than 648,000 aviation jobs need filled over the next 20 years. That's the reason technical education is the hottest thing in learning. If you want to do something you love and something you know has a rewarding career path, then a Spartan education is the answer.

Your Career

While no college can guarantee job placement, our career services teams work with a multitude of employers, both domestically and abroad, to afford you the best opportunity for employment. Spartans are employed by major aerospace companies such as **Aerotek, Ball Aerospace, Boeing, Duncan Aviation, Endeavor Air, Envoy Air, Lockheed Martin, Papillion Grand Canyon Helicopters, SkyWest Airlines** and many more.
